XX

CC The present sequence represents an expressed sequence tag (EST), and is  
CC a polynucleotide of the invention. The polynucleotides of the invention  
CC are all secreted EST sequences isolated from a variety of human tissue  
CC sources. The EST sequences and proteins encoded by them are predicted to  
CC have useful biological activities which would make them suitable for  
CC treating, preventing or ameliorating medical conditions in humans and  
CC animals, although no supporting data is given. Suggested activities  
CC include nutritional activity, immune stimulating or suppressing activity,  
CC haematopoiesis regulating activity, tissue growth activity,  
CC activin/inhibin activity, chemotactic/chemokinetic activity, haemostatic  
CC and thrombolytic activity, receptor/ligand activity, anti-inflammatory  
CC activity, cadherin/tumour invasion suppressor activity, tumour inhibition  
CC activity. The EST sequences are also stated to be useful for gene  
CC therapy.
